## Reveal™ Collection Carved + Textured Wall Panels

The Reveal Collection explores the contrasts in color, grain and texture created by different carved designs. RealCore™ technology is utilized to ensure core integrity and structure though the design. Reveal panels are available in ULEF (ultra-low emitting formaldehyde) and a prefinished non-emitting panel confirmed by Cal. Sec. 01350 testing. Reveal can also be specified FSC 100% and can contribute to multiple LEED credits. All Reveal panels are available pre-finished or unfinished.

## Sound™ Collection Acoustical + Textured Wall Panels

The Sound Collection approaches aesthetics-with-function using proprietary sound dampening QuietWall™ technology that can achieve up to a .7 sound abatement rating. Great for hospitality, commercial, public or private spaces where sound reduction is desired. RealCore™ technology is utilized to ensure core integrity and structure though the design. Sound panels are available in ULEF (ultra-low emitting formaldehyde) and a prefinished non-emitting panel confirmed by Cal. Sec. 01350 testing. Sound can also be specified FSC 100% and can contribute to multiple LEED credits. All Sound panels are available pre-finished or unfinished.

## Linear™ Collection Wall Panels

The Linear Collection explores the natural linear character of laminated Bamboo strips. Contrasting and alternating cores are employed to create new and different patterns, some resembling hand-woven natural textiles. Natural stains and finishes are also applied to achieve new tones and colors. RealCore™ technology is utilized to ensure core integrity and structure though the design. Linear panels are available in ULEF (ultra-low emitting formaldehyde) and a prefinished, non-emitting panel confirmed by Cal. Sec. 01350 testing. Linear can also be specified FSC 100% and can contribute to multiple LEED credits. All Linear panels are available pre-finished or unfinished.

## DuraPalm® Collection Textured Palm Wall Panels

Both Deco and Woven palm wall panels utilize natural palm lumber harvested from plantations after the useful productive life of the plant. Palm lumber produces a wonderful range of grains, textures and colors giving this material a lively, vibrant and warm character.  Durapalm Deco and Woven panels are produced using formaldehyde-free adhesives and passes the Cal. Sec. 01350 testing protocols. Durapalm can contribute to multiple LEED credits. The Deco comes standard with an oil finish and the Woven comes with a polyurethane finish.
