

Case Study: HiTech/Commercial

WebMD

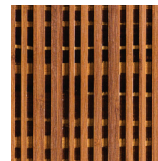

Industry:
HiTech/Commercial

Location:
New York, NY

Architect:
TPG Architecture

The Architects for WebMD, the New York City, web-based clearing house for health related topics was looking for something that could create excitement and maintain a modern linearity to the look. We showed them our range of Linear lines panels, but the LL4 with the Neopolitan core pattern stuck out. This panel incorporates a perpendicular, organic, woven, two-tone core with the linear lines of the surface grain. The effect is almost textile-like with a hardwood feel to it. It was just the contrast point needed in this modern but comfortable office setting.

Materials:

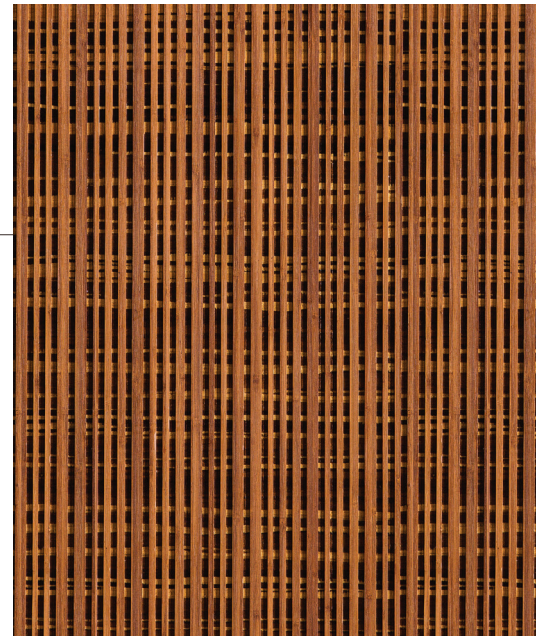

Linear Line Collection
Style: LL4
Color: Amber

Specifications

Possible LEED Credits:

Low emitting materials and certified wood

Physical/ Mechanical Properties: Linear Line Collection

Dimensions:	3/4" x 47 3/4" x 95 3/4" - 19mm x 1213mm x 2432mm
Construction:	RealCore™ 3-ply
Installation:	Can be used in Walls, Ceilings & Millwork applications
ASTM E84: Surface Burning	Class C standard. Can be ordered as Class B and in some cases Class A
ASTM D6007-02: Formaldehyde Concentration in Air from Wood Products small chamber test	Plyboo = 0.004 ppm (surpasses CARB II standards, 0.05ppm & ULEF standards of 0.04ppm)
Finish:	Penofin Verde Natural Oil (Colors: Natural, Fog, Storm, Mist, Noir)
ASTM 4442: Moisture Content	6-9% average
